

Viewing PowerPoint Presentations

Overview

The PowerPoint presentations available in this course have been converted to HTML5 format so that they can be viewed both on a computer and on most mobile devices. The increased compatibility allows for better viewing on demand. The presentations also include both PDF and PowerPoint versions for download to ease with printing of the presentations when desired.

Printable Versions

The printable PDF and PowerPoint versions of the presentations can be found in the upper left corner of the presentation under the Resources link. Select the version of your preference to download. Once downloaded you can print as you normally would.
